A farewell reception and hop was tendered Mr. and Mrs. L. H. Tolfree and their daughter, Miss Gertrude, by the "Entre Nous," at the opera house last evening.

Inspection Proves a Leak.

A number of the Santa Fe Pacific railroad representatives and citizens of Flagstaff visited the Smith springs Sunday to ascertain what they could regarding the shortage of the water supply. It was discovered at once that a large amount of water was being wasted on account of a leak under the dam. The Santa Fe company have donated 2,500 feet of three inch pipe, and the Arizona Lumber and Timber company started a number of their men to hauling the pipe out to the dam Wednesday, and work was commenced at once to make all necessary repairs. When the pipe is put down and all waste of water discontinued, there will be an increase of about 125,000 gallons of water per day, which will add greatly to the daily demand for water. We have a first-class system of water works but for some reason unknown to the city council until the investigation last Sunday, we were short of water. The mystery is now cleared, and in the future there will be no need for any fear of a scarcity of water.

Don't fail to see our line of Ladies' Foot Wear before buying. Flagstaff Cash Store.

DR. J. S. WEISER,

A NOTED EYE SPECIALIST
